

Exporting PDF's from InDesign:

1) Go to File, Scroll down to Export

2) Export Screen will appear:

a) Adobe PDF Preset should read High Quality Print

b) Under Compression tab, make sure it reads as follows:

Color Image - Bicubic Down Sampling to : 300 pixels per Inch
 - For Images Above: 450 pixels per Inch
 - Compression: Automatic JPEG
 - Image Quality: Maximum

Grayscale Images: - Bicubic Down Sampling to : 300 pixels per Inch
 - For Images Above: 450 pixels per Inch
 - Compression: Automatic JPEG
 - Image Quality: Maximum

Monochromatic Image: - Bicubic Down Sampling to : 1200 pixels per Inch
 - For Images Above: 1800 pixels per Inch
 - Compression: CCITT Group 4
 - Image Quality: Maximum

Compress Text and Line Art

Crop Image Data to Frames

c) Mark and Bleeds: (This will depend on your job and what it requires)

- In most cases we prefer no marks, since we apply our own.

- Bleeds: Enter value of bleed in provided area.

* Please Note: We must have at least .125 Inch if the job has bleeds.

d) Output:

- Color Conversion: No Color Conversion

- Profile Inclusion Policy: Include Tagged Source Profiles

e) Advanced: Nothing should change on this tab

f) Security: If file is Password Protected, we must have the password.

3) After all that is done, Hit Save.
